OBJECTIVE

Computer science student with a foundation in web development, seeking to leverage experience in building full-stack applications using technologies like React, JavaScript, and SQL. I aim to enhance my frontend and backend website design skills while contributing to projects that combine web development with AI and ML solutions. Committed to learning and applying technologies to solve real-world challenges.

EDUCATION

B.Sc in Computer Science and Engineering Military Institute of Science and Technology <ul style="list-style-type: none">Not completed yet	May 2022 - ongoing
Higher Secondary Certificate Adamjee Cantonment College <ul style="list-style-type: none">Final GPA: 5.00	June 2019 - Dec 2021
Secondary School Certificate Bangladesh International School and College (BISC) <ul style="list-style-type: none">Final GPA: 5.00	Jan 2008 - Feb 2019

PROJECTS

PCOS Journey <ul style="list-style-type: none">Developed a Java-based desktop application to connect doctors and users for interaction and consultation.Integrated features like self-diagnosis quizzes and medicine reminders to assist users in managing their PCOS.Used JavaFX for the frontend and Java for backend processing.	Nov 2023
Focus Forge <ul style="list-style-type: none">Developed a CRUD web application that helps users enhance focus and productivity through features like a to-do list, timer, and music player.Front-end built using HTML, CSS, and JavaScript, with a user-friendly interface for task tracking and concentration aid.Back-end powered by PHP and MySQL database.	Jan 2024
Maternity Maven <ul style="list-style-type: none">Developed using React for a responsive and dynamic user interface, and Express.js for efficient backend API management.Integrated Oracle database to securely store and manage user data, ensuring reliable performance and scalability.Features include health tracking, appointment scheduling, and communication between patients and healthcare providers.	Oct 2024
